Fact Sheet

INFORMATION AND DATA SECURITY

Overview

Information Security (InfoSec) involves managing data and information to ensure accuracy, efficiency, and protection against unauthorized access. It goes beyond IT and cybersecurity, encompassing all areas of an organisation that handle data—including everyone within the company. This includes various types of organisational information such as customer contracts, financial records, and employee data held by Human Resources (HR).

Duration:
1 Hour

Assessment:
Multiple-Choice Questions

Price:
